

## ABOUT THE CAMPAIGN

### COVID-19: Right to Know

*On Wednesday April 28, the day before the release of Ronnie Cummins and Dr. Joseph Mercola's new book, [The Truth About COVID-19: Exposing The Great Reset, Lockdowns, Vaccine Passports, and the New Normal](#), please join us at 8 pm Eastern for a COVID-19 tribunal exposing willful misconduct.*

[Learn how you can take action!](#)

\*\*\*\*\*

Shortly after the World Health Organization [declared](#) COVID-19 a global pandemic, Organic Consumers Association (OCA) set out to provide the best health-related information and resources, and the best available reporting on the origins of the virus.

On health, OCA's coverage focuses on how best to minimize the risk of becoming infected with the virus—and for those already infected, how to minimize the severity of the symptoms. We emphasize the link between improving overall health, especially through good nutrition, including by boosting [Vitamin D levels](#).

As the pandemic has unfolded, doctors and scientists have reported that those in the high-risk category include people who suffer underlying health conditions, including diet-related illnesses such as obesity, Type 2 Diabetes and [hypertension](#).

We continue to provide updated information as it relates to food, nutrition, health and the prevention of COVID-19.

### Where did it come from?

On the origins of COVID-19, we believe it's of critical importance that the origin of this virus becomes known, in order that the necessary steps can be taken to reduce the risk of future pandemics.

Some scientists posit that COVID-19 is a zoonotic disease that jumped from a bat to humans, possibly via another animal such as a pangolin, and subsequently infected someone at a wet market in Wuhan, China.

Zoonotic diseases are responsible for past pandemics, some of which originated in the wild, others in industrial factory farms. Industrial agriculture, which is [responsible](#) for widespread wildlife habitat destruction and factory farms that create the perfect conditions for zoonotic diseases, has been at the root of several pandemics, including the [H1N1 Swine Flu](#).

Though not directly implicated in the COVID-19 pandemic, industrial agriculture should be viewed as a potential source of future pandemics.

The preponderance of evidence indicates that COVID-19 is the product of [gain-of-function](#) research conducted in a lab, likely in Wuhan, using genetic engineering and animal experimentation. Scientists in this camp reject that the virus could have evolved naturally, in part because of the fact that COVID-19 is by leaps and bounds far more infectious and transmissible than any of the naturally evolved coronaviruses studied in the past. Gain-of-function research, alternately [referred to](#) as "biomedical," "biodefense" or "biowarfare" research, is highly controversial. In 2014, more than 300 scientists [called for a moratorium](#) on gain-of-function research. The

scientists, known as the Cambridge Working Group, argued that the benefits of these experiments in no way justifies the potential risks.

### Getting to the truth, politics aside

No definitive proof exists for either the zoonotic or lab-created theory. Unfortunately however, the debate has taken on [political overtones](#) that threaten to preclude or derail any honest and thorough investigation into the origins of the pandemic.

OCA believes the lab-created theory is far more plausible, based on the evidence uncovered to date. We also believe that, as with any story or investigation involving large sums of money, government involvement, big egos, big industries and huge stakes, it will require relentless investigation and bold reporting to uncover the whole truth. We are committed to both.

## The Progressive Case Against Medical Mandates, Part 1

There is little doubt that the Covid vaccine issue is dividing the nation. The people are tired of Covid restrictions, and the Biden administration paints the Covid vaccine as a kind of savior - the "only way *back to normalcy*."

Often the *Covid vaccine decision* is framed as a *Right versus Left* issue. Those on the political right say it is an issue of freedom and bodily autonomy. Those on the political left say it is a question of protecting the vulnerable and necessary for the greater good.

But the Covid vaccine question is more complex than the media or the Biden administration would like to acknowledge. At its core, the vaccine decision is a civil rights issue. [Read More](#)

## What Really Happened at Wuhan?

Since the onset of the international health and political crisis precipitated by COVID-19, I've been obsessively reading articles, scientific papers, and books on the pandemic and watching videos and podcasts. I've been discussing and exchanging emails with my closest and most well-informed activist and scientific counterparts across the globe, on a daily basis, especially focusing on the now obvious lab origins and genetic engineering of SARS CoV-2 and the Establishment cover up and censorship that is now unraveling. I've written and selected for publication in this newsletter numerous articles and videos, and co-authored a best-selling book with Dr. Joseph Mercola, *The Truth About COVID-19 on the origins, nature, virulence, prevention, and treatment of COVID-19*.

In preparation for our upcoming campaign to defund and ban the Mad Science of weaponizing viruses, bacteria, and insects, euphemistically called Gain-of-Function research, that gave rise to COVID-19, I've doubled-down on my research. This week I just read and then reread an important book on the origins of the pandemic, written by an Australian investigative reporter Sharri Markson, entitled *What Really Happened at Wuhan: The Cover Ups, the Conspiracies, and the Classified Research*. ## Fighting Back Against the "Book Burners"

Organic Consumers Association Director Ronnie Cummins, Dr. Joseph Mercola, Robert F. Kennedy Jr., and Chelsea Green Publishing have filed a federal lawsuit against Senator Elizabeth Warren (MA) for violating the plaintiffs' constitutionally-guaranteed free speech, specifically by sending out a letter, reprinted widely in the mass media, demanding that Amazon (and by implication others) stop selling Cummins and Mercola's best-selling book, *The*
