How the Gates Foundation seeded America's COVID-19 policy catastrophes

The nursing home death warrants were signed by panicked governors using Gates-funded forecasting.

Jordan Schachtel

Feb 16 46 75

New York Governor Andrew Cuomo is finally facing the heat for his botched and criminally negligent coronavirus response policies, yet no one seems to be asking why Cuomo and select governors made the fateful decisions that led to the excess deaths — and the coverup campaigns — of tens of thousands of senior citizens in New York and elsewhere across the United States.

After being awarded an Emmy and writing a book on his supposedly heroic response to the pandemic, Cuomo is finally receiving the very necessary inquiries into his handling of the crisis. Cuomo is perhaps the most

Bill and Melinda Gates Foundation.

In March and early April, politicians were informed by the modeling “experts” at Gates-funded IHME that their hospitals were about to be completely overrun by coronavirus patients. Modelers from IHME claimed this massive surge would cause hospitals to run out of lifesaving equipment in a matter of **days**, not weeks or months. Time was of the essence, and now was the time for rapid decision making, the modelers claimed.

Discharge Planners

COVID-19 has been detected in multiple communities throughout New York State. There is an urgent need to expand hospital capacity in New York State to be able to meet the demand for patients with COVID-19 requiring acute care. As a result, this directive is being issued to clarify expectations for nursing homes (NHs) receiving residents returning from hospitalization and for NHs accepting new admissions.

Hospital discharge planning staff and NHs should carefully review this guidance with all staff directly involved in resident admission, transfer, and discharges.

During this global health emergency, all NHs must comply with the expedited receipt of residents returning from hospitals to NHs. Residents are deemed appropriate for return to a NH upon a determination by the hospital physician or designee that the resident is medically stable for return.

Hospital discharge planners **must** confirm to the NH, by telephone, that the resident is medically stable for discharge. Comprehensive discharge instructions must be provided by the hospital prior to the transport of a resident to the NH.

No resident shall be denied re-admission or admission to the NH solely based on a confirmed or suspected diagnosis of COVID-19. NHs are prohibited from requiring a hospitalized resident who is determined medically stable to be tested for COVID-19 prior to admission or readmission.

Information for healthcare providers on COVID-19 is readily available on the New York State Department of Health public website at <https://coronavirus.health.ny.gov/information-healthcare>.

The Nursing Home Death Warrants

With almost 70,000 lives lost in the span of months, the 5 states of New York, New Jersey, California, Pennsylvania, and Michigan account for almost half of the COVID-19 related deaths in the United...

On two separate April 1 and April 2 press conferences, Cuomo made clear that his policy decisions were based off of the IHME model.

“There is a group that is funded by the Gates Foundation. Thank you very

much Bill Gates,” Cuomo said on April 1 in discussing ICU needs and how he was using Gates models to make other healthcare policy decisions.

@MSNBC

According to the Gates Foundation-funded IHME model, 16,000 New Yorkers are expected to die from coronavirus.

Gov. Cuomo: "That would mean that NY is only 16% roughly of the number of deaths ... What that does say to the rest of the nation is – this is not just New York."

“There's only one model that we look at that has the number of projected deaths which is the IHME model which is funded by the Gates Foundation,” Cuomo **said** on April 2, adding, “and we thank the Gates Foundation for the national service that they've done.”

In an April 9 briefing, Michigan Governor Gretchen Whitmer **referred** to the IHME model in order to project deaths and the PPE resources needed for the supposed surge.

It was the same story with the government of Pennsylvania. The PA Health Department **exclusively** uses IHME models to forecast coronavirus outcomes.

Governor Phil Murphy, another nursing home death warrant participant, **used** IHME models to navigate the state's policy response.

It wasn't just state governors relying on this data, federal bureaucrats Dr. Anthony Fauci and Dr. Deborah Birx, **both** of whom have **substantial** ties to the Gates network, used the IHME COVID-19 forecasting models (which Birx **endorsed specifically** as the best prediction modeling outfit) to make policy recommendations to states. In her White House briefings, Birx, who simultaneously had a seat on the **board** of a Gates-funded institution, almost exclusively relied on IHME models to project outcomes.

Julie Kelly 🇺🇸
@julie_kelly2

Some people defending Dr. Birx haven't followed this debacle from the beginning. Birx, tied to IHME propaganda operation, should've been fired after presenting Murray and Ferguson models to Trump in late March. She and Fauci told him to shut down economy:

Time to Sideline the False Prophets of Doom - American Greatness

The warning from the nation's top public health official was terrifying. "This is going to be our Pearl Harbor moment, our 9/11 moment, only it's not going to be localized," U.S.

These models, and the policy decisions that were made by relying on them set off a chain of events that led to indefinite lockdowns, complete business closures, statewide curfews, and most infamously, the nursing home death warrants.

States across the nation went to extremes, resorting to full bunker mode while waiting for bodies to start dropping in the streets, but the IHME modeling never panned out. Hospital capacity was never threatened. Most states that had created "surge capacity" pop-up health care centers never even used these facilities. IHME, for its part, regularly "adjusts" its models, and has never acknowledged their routine failures to forecast outcomes.

Bill Gates has never discussed the catastrophic failures of his prized "health metrics" forecasting organization, and how it has contributed to the

suffering of millions of Americans. Instead, he has seamlessly washed his hands of COVID mania, and has moved on to demanding that the western world sacrifice itself in the name of the latest “crisis” that is climate change.

NEW - Bill Gates on the global green reset: "It's an all-out effort, like a world war, but it's us against greenhouse gases."

Bill Gates: Rich nations should shift entirely to synthetic beef
In his new book, “How to Avoid a #Climate Disaster,” Microsoft cofounder lays out tech breakthroughs and sweeping policies we’ll need to take on global warming. #vegan #animals #sentientism

Bill Gates: Rich nations should shift entirely to synthetic beef

We spoke to the Microsoft cofounder about his new book, the limits of his optimism, the tech breakthroughs and energy policies we need—and how his thinking on climate change has evolved.

In December, however, Melinda Gates **acknowledged** that “we hadn’t really thought through the economic impacts “ of demanding that people stay locked in their houses indefinitely, among other policy requests demanded by Gates Inc.

The IHME models that demanded lockdowns and other insane restrictions relied entirely on sketchy COVID-19 data coming from the city of Wuhan, China. The early statistics concerning deaths, hospitalizations, and overall age stratification have not come close to matching the actual data on the virus. For example, IHME used a 3+% death rate when the real number *from* COVID-19 is only around 0.1%. IHME’s risk projections, which they presented as sound science, were all incredibly overinflated.

The buck does indeed stop with the elected leaders who made the fateful decisions to send sick COVID patients into nursing homes, lock down their states, and mask up their citizens in perpetuity, but that’s only half of the story. The bad data they used almost exclusively came from the Gates network, which has trafficked in pseudoscience and has demonstrated complete incompetence and reckless forecasting since the beginning of last

year.

In addition to the nursing home deaths Cuomo is responsible for deaths among hemodialysis patients in NYC. A family member works in one of the dialysis units in NYC. 16 of their patients died, 8 "from covid" and 8 more died because they couldn't get needed hospital treatments related to hemodialysis because "it wasn't an emergency". Once a person is on hemodialysis they will need on going medical care to keep their shunts open etc. To deny them needed treatment is murder. This is one of the problems of others controlling our healthcare- we should decide what we need and when, not some politician and certainly not some billionaire with a god complex. May they soon experience the consequences their decisions.

Right now there's snow on the ground. But I'm researching how to grow enough food for 120 people on 3 acres. Also networking with local farmers and others who can grow anything.

We need to figure out how to combat American hunger—brought to us courtesy of the Bill & Melinda Gates Foundation.

Crazy Billy can stick his synthetic beef (concocted of over-refined, low grade soy and mashed beetles) and put it where the sun he wishes to block out doesn't shine.

I guess when he read comic books as a kid instead of rooting for Superman he aspired to be Lex Luther.
