

The Plan to Tag Us for the New World Order Slave System

Analysis by [Dr. Joseph Mercola](#)

✓ Fact Checked

STORY AT-A-GLANCE

- › Dozens of peer-reviewed studies show that when COVID-19 is treated within the first few days of symptom onset, there's an 85% reduction in hospitalization and death
- › With Omicron, we have been gifted a best-case scenario. The highly contagious virus can rip through the population, causing only mild cold symptoms, thus producing herd immunity without the risk of mass casualties
- › Two months before the rollout of the COVID shots, the U.S. Food and Drug Administration was aware that they could cause serious problems, including heart attacks, strokes, myocarditis, blood clots, neurological problems and more, yet they pushed them anyway
- › Dr. Vladimir Zelenko believes SARS-CoV-2 is a bioweapon. Patents spanning two decades support this view. Those who created the weapon also investigated and identified antidotes, which includes the zinc ionophore hydroxychloroquine
- › The antidote to COVID was intentionally suppressed to encourage people to get the COVID jab, which Zelenko believes is a tool to tag people for the New World Order slave system

Dr. Vladimir Zelenko, whom I've interviewed twice previously, was among the first U.S. physicians to develop an early treatment program for the novel SARS-CoV-2 infection. He popularized the use of hydroxychloroquine and zinc, and when hydroxychloroquine became increasingly difficult to obtain, he was also among the first to identify

quercetin as a viable alternative.

When the pandemic started, Zelenko was practicing in New York. He has since moved to Florida, where he's been giving interviews for several hours a day, trying to spread the word about early treatment and prevention. As noted by Zelenko:

"It's a very treatable infection – or should I say bioweapon? – if done within the first few days, because COVID is two diseases. It's the infectious stage of the virus, and then a week later, you have the pathogenic inflammatory reaction that does all the damage to the lungs and causes blood clots.

So, it's all about timing. And the data is very clear. There are dozens of peer-reviewed studies that prove if you treat COVID within the first few days, you have an 85% reduction in hospitalization and death. It's a no-brainer. You could have saved 700,000 people from going to the hospital out of 800,000."

While licensed to practice medicine in Florida, Zelenko now spends most of his time educating the public and other doctors. He's also available via telemedicine, but his passion has become researching and developing simple, natural approaches to complex health problems – including his own.

The Road Less Traveled

Zelenko has a rare type of cancer called pulmonary artery sarcoma, which is typically fatal. He's also undergone two open-heart surgeries and three years of chemo and radiation, none of which has resolved his problems.

"Almost four years ago, I was diagnosed with pulmonary artery sarcoma. There are only 10 cases on average per year, and they're all found at autopsy. In my case, they thought it was a blood clot that didn't respond to blood-thinning medication.

So, the decision was made to do an embolectomy, open my chest, go into the

pulmonary artery and take out the blood clot. But when they did that, they saw it was a tumor, and it had completely destroyed my right lung. So, I lost my right lung. And they resected a large part of the pulmonary artery and had to reconstruct it because you need that artery to live.

Then I was in chemo ... I was pretty good for two years, and then it came back and had spread to my hip as well. And so, I had another open-heart surgery. They had to replace one of my heart valves, pulmonic valve. Then I went for radiation to my hip [followed by] really heavy chemo.

After two months on that, I went into congestive heart failure and developed cardiomyopathy ... I recovered from that, and was put on heart failure medication ... A month after that ... I developed COVID pneumonia ... I was pretty sure I was going to leave in a box, yet I recovered.

A few months later, I went for another CT scan, and they found, again, the tumor was back in the pulmonary artery, but this time, no doctor wanted to operate on me. A third open-heart procedure is very dangerous. They estimated more than 50% likelihood I would die on the table, which I didn't like. So, I ended up having pretty intense radiation to my mediastinum, where the tumor was.

That's when you came into the picture, in terms of advising me about treatment. I ended up having immunotherapy in Europe for two months with checkpoint inhibitors, but also hyperthermia and mistletoe injections, and alpha lipoic acid, high-dose vitamin C [infusions] and different other modalities. And I feel better than ever.

I had a CT scan last week, and it showed the tumor shrank by one-third. I spoke to the radiation oncologist who told me that a good result would've been the same size or smaller. It takes years to resolve. So, time will tell, but it's easier for me to walk, and hemodynamically I'm more stable, and I feel good. Amen."

The Surprising Role of Immunotherapy in Cancer

Overall, the “COVID story has completely changed the way I look at life,” Zelenko says. When he saw how natural, effective, over-the-counter solutions for COVID were suppressed, while experimental gene transfer shots were pushed, he realized other treatments might also be suppressed, such as cancer treatments.

“Probably, effective approaches were marginalized in lieu of the more expensive pharmaceutical approaches,” he says. “I’ll give you one example. Dr. [William] Coley was an oncological surgeon who lived around 100 years ago, maybe 120 years ago. He noticed that he would operate on his patients, and the tumor would come back and they would die. And then he observed something very interesting.

He had a patient with pancreatic cancer, Stage 4, inoperable. That patient got very sick with an infection and became septic. He almost died, but he recovered and his tumor went away. He noticed that type of phenomenon a few more times, and realized that there must be some immune reaction, immune response to the infection that wakes up the immune system to also attack the tumor.

So basically, in my opinion, that was the birth of immunotherapy. Fever seems to play a role. It seems to have antitumor properties, as well as activating certain parts of your immune system. So, it’s fascinating. And that information was buried for a good long time – 50, 60 years – until some doctors rediscovered it and started doing research. And I benefited from that in Europe.”

Hyperthermic Treatment for Cancer

We’ve come a long way since the days of Coley, who used toxins to trigger infection and fever. Today, hyperthermic treatment is used instead. Basically, it’s all about

raising your body temperature to about 104 degrees Fahrenheit for four to six hours. Zelenko describes the treatment he underwent:

"It was quite an experience, having a temperature around 40 Celsius, let's say 104 degrees Fahrenheit, for five hours. You become a little loopy and a little anxious, but I drank a lot of fluids and had a nurse with me all the time. It was a pretty interesting experience.

There were whole-body hyperthermia machines and localized hyperthermia. Both are basically a fancy sauna. It was like a spa actually. I did enjoy the treatment in most cases."

As an aside, I sincerely believe sauna bathing is one of the most powerful biohacks available. I do it four times a week. I get my temperature up to about 102 degrees F. or so, for 20 minutes. I've found it to be a profoundly effective health habit to nip infections in the bud, and may also help put the brakes on any potential malignancies. I am currently using a prototype full-spectrum SaunaSpace sauna that is EMF-free, has eight 250 watt bulbs and will likely be available later this year.

Omicron Is Unstoppable, But Not To Be Feared

Getting back to the issue of COVID, over the past two years, the SARS-CoV-2 infection has gone through a number of changes. Omicron, for example, is far more contagious, but has far less severe symptoms. As noted by Zelenko:

"Omicron is unstoppable. It's more infectious than measles. Everyone's going to get it. Sorry, but that's the case. However, it seems to attack only the upper airway in most cases, and there are very few deaths. It's very responsive to treatment as well, so there's no reason to be afraid of it."

In fact, we appear to have been gifted a best-case scenario, in which a highly contagious virus will rip through the population, causing only mild cold symptoms, thus producing herd immunity without the risk of mass casualties. "When two-thirds

of the population gets through it, it essentially shuts down the pandemic,” Zelenko says.

Vaccinating During a Pandemic Breeds Variants

In the interview, Zelenko explains how the many variants we’ve seen have probably been a result of the mass “vaccination” campaign.

Three respected immunologists, Dr. Luc Montagnier (who won the Nobel Prize in 2008 for his discovery of the HIV virus), Dr. Sucharit Bhakdi, the most published immunologist in history, and Dr. Geert Vanden Bossche, a top immunologist in The Netherlands, have all warned that when you mass vaccinate in the middle of an active outbreak, you cause variants to emerge.

“You exert evolutionary pressure and breed more varying viruses,” Zelenko says. “Now, there are two or three possibilities. One could be that it was unintentional. Good, well-meaning people developed what they thought would help – a vaccine. However, giving it to people during a pandemic has been an absolute failure. ‘Oops, we’re sorry.’ That’s one possibility.

The other possibility is that whoever has orchestrated this knows exactly what they’re doing, and they are doing it on purpose to maintain the new variants and the consequences of that, which is essentially a psyop [to cause] a global psychosis due to fear, lockdowns and wearing a face diaper.

There’s one more possibility. There’s no dispute; everyone who knows the facts and has studied the issue knows that COVID-19 is a weapon made in a laboratory. Gain-of-function research is nothing more than making a weapon of mass destruction and genocide, and there’s a patent trail 20 years long that documents the different stages of development of this weapon.

And here’s my supposition. I have no evidence of this, but I could say the following: If I could make the original virus, I could make variants. It’s very

easy. You just change a few sequences of the code that goes with the spike protein. You change its three-dimensional shape, and if you do it enough, eliminate existing antibodies.

So again, I don't have evidence for that, but I do have evidence that [SARS-CoV-2] is an artificially-made bioweapon. So why wouldn't it be possible to make variants the same way? I think it's kind of a combination, multifactorial cause of variants – the natural God factor, the evolutionary pressure exerted by vaccinating people during an active pandemic, and then just outright making them.”

Antidotes to the Bioweapon Were Developed Beforehand

Zelenko goes on to recount a relatively recent realization. Back in March 2020, he saw a MedCram video, episode 34,¹ in which Dr. Roger Seheult explained some of the principles that he then ended up building his COVID protocol on. Seheult specifically quoted a paper that explained the functioning of zinc ionophores.

That mechanism is what Zelenko relied upon when developing his own protocol. However, he didn't realize until December 2021 that the author of that central paper was Dr. Ralph Baric. Why does that matter? Zelenko explains:

“In 1999, Ralph Baric, funded by the U.S. government, at the University of North Carolina at Chapel Hill, figured out how to take an animal virus and have it be able to infect other species, different animals, in other words, cross-species infection.

In 2015, the same Dr. Ralph Baric, and Dr. Zhengli [at the Wuhan Institute of Virology in China], funded by the National Institutes of Health, figured out how to make a corona bat virus infect human beings, and augmented its lethality to human lives. That was in 2015. But in 2010, Baric published that paper that I'm referring to.

So, the development of the weapon happened in stages, but before it was unleashed onto the human population, or the development of it being able to infect human beings, an antidote was made. Research paid for by the government was published.

The same people that made the bomb, let's say, also created the antidote to diffuse the bomb. And then, when the pandemic arrived, doctors like myself, out of necessity, came up with creative solutions, based – in my case, unknowingly – on this work. And immediately, that information was marginalized and suppressed, and doctors were deplatformed for advocating for it.

So, the government who made the bomb also knew about the solution. And the reason why is they didn't want to die. The stakeholders here don't want their families to die. But for you and for me, they have a different agenda. So, they had that information.

I have knowledge that the Google executives are all taking hydroxychloroquine and ivermectin for prophylaxis, as is half of Congress. And so, the people that have orchestrated this knew the answer, and use it for themselves. Even doctors know the answer for themselves.

They prescribe [these drugs] for themselves, or they call me. But when patients come, they say there's no treatment, go home, take Tylenol. So, this is mass murder.”

The COVID Jabs – Another Crime Against Humanity

In addition to killing untold numbers of people by denying and suppressing early treatment options, governments around the world are also killing people with the COVID jabs. A year into the aggressive campaign to inject as many people as possible, it's likely the shots have killed more people than have died from the

infection. It's very difficult to tell, unfortunately, because the data are so seriously manipulated.

“ In 2015, Bill Gates said that the world population needs to be reduced by 15% through the use of vaccines because of global warming. The same Bill Gates in 2020 said 7 billion people must be vaccinated. Why would I take a vaccine for my health from someone who's advocating the use of vaccines to reduce the world population? ~ Dr. Vladimir Zelenko ”

Zelenko estimates somewhere between 500,000 to 1 million Americans have been killed by the shots to date. Disturbingly, the U.S. Food and Drug Administration was aware that the shots could have serious consequences, yet they pushed them anyway. What's more, they refuse to address the mindboggling number of adverse events reported to the Vaccine Adverse Events Reporting System (VAERS). The safety signal couldn't possibly be clearer.

“In October, 2020, two months before the vaccine rollout, there was an internal presentation in the FDA to its scientists, and on slide 16 of that presentation, there was a list of side effects: death, heart attack, stroke, blood clots, horrific neurological diseases, myocarditis and many, many more,” Zelenko says.

“Now keep in mind, this is two months prior to the rollout. After the vaccines were rolled out, and a few months into it, when the VAERS database started showing the side effects that people were experiencing, there's a 100% correlation with what that slide said would happen, and what actually happened to human beings.

That is premeditated mass murder. FDA knew exactly what it was doing. They knew exactly the side effects, and they released it anyway ..."

What's the Real Agenda?

Why would the FDA behave this way? Why aren't they safeguarding public health from a clearly lethal treatment? And on the other hand, why aren't they allowing doctors to help people with early treatment? Zelenko explains:

"In the mid-'90s, it became obvious that the American economy was doomed. The Medicare and Social Security systems would become insolvent, and that would cause a tsunami-like effect nationally and internationally. And it was unstoppable. It was [mathematically inevitable]."

Medicare, according to Congressional Budget Office, in 2027 will begin the process towards bankruptcy. So, security as of today [will last until] 2034. Now, the major stakeholders in the world economies saw an existential threat. They understood that their power and wealth was in real jeopardy.

And so a plan was developed, which was beyond the technology at that time, but the technology was being developed. So, for example, the Human Genome Project was mapped and completed.

Then CRISPR technology was developed, which is gene editing or gene splicing in very precise ways. That was sold as a way to cure genetic diseases. There's a defective gene. You can just cut it out and splice in, cut and paste, basically, a healthy gene.

That's the upside. The downside is that it creates possibilities to do gene editing for nefarious reasons. In 2015, Bill Gates said that the world population needs to be reduced by 15% through the use of vaccines because of global warming.

The same Bill Gates in 2020 said 7 billion people must be vaccinated. So, the obvious rhetorical question is, 'Why would I take a vaccine for my health from someone who's advocating the use of vaccines to reduce the world population?'

In 2016, Klaus Schwab, in an interview said something very strange. He said that within 10 years, by 2026, every single human being will be tagged with a digital identifier. What does that mean, and why?

Let's go through the sequence of events. A bioweapon is made with an antidote, which is being suppressed and hidden. [The bioweapon] is released. It's extremely easy to treat. However, that information is being suppressed, and access to those medications is being suppressed, and doctors who are advocating for it are being persecuted.

Anything that seems to give people hope, lessen anxiety, encourage reintegration with your loved ones seems to be immediately vilified, even early intervention. If you look at the NIH, they recommend, as of today, not to treat COVID unless they're in the hospital with lung damage. Don't do that.

And so, I was wondering, what is really going on? And why this incessant push to vaccinate everyone? Why jail doctors for using meds at work? Because it encourages the vaccine hesitancy.

Then I realized something. There were two patents that I became aware of. They're separated by a year, but they're linked in the puzzle, in the concept. One was August 31, 2021, that describes ... nanotechnology engineering.² It basically describes the following:

That there is the capability, the technology, already existing, in these vaccines that allows for the measurement of biometric data, meaning your heart rate, your respiratory rate, temperature, and then the transmission of that data with your location to a third party.

That didn't even make sense to me. Like what? But then I realized there's another patent owned by Microsoft. This one I remember by heart. It's an international patent, WO202060606. You can't make this stuff up. That patent describes linkage of biometric data transmission to cryptocurrency.

Then I got it. And by the way, 2026, when everyone's supposed to be tagged with a digital ID, let's call it an internal Auschwitz tattoo, is a year before the beginning of the insolvency of Medicare and the beginning of economic collapse. And so, the real agenda has become obvious to me.

It's never been about health. COVID-19 is easy to treat. It was always about using fear and mass psychosis to get 7 billion people to willfully get injected with the technology that would permit them to participate in the new cryptocurrency-based system, the system that the world will use for finance.

Fiat currency and all the traditional ways of transactions will be gone. The only way that you actually will be able to participate in transactions, of buying bread, let's say, is having a transmitting sensor of information with your location. It's the mark of the beast, if you really want to know. With that, you can then buy bread for your family ...

Gates and Schwab [are] both talking talk about how these vaccines change who you are. What does that mean? They explain it. [With] the gene editing technology, they are making the human better. That's transhumanism. I call it Human 2.0. Human 1.0 is the version made by God. We are is imprinted [with God] in our genetic code. We're made in the image of God because we have his code in us.

Now, would you give Bill Gates or Klaus Schwab the password to your home security system? Why would we give him access to our genetic code? Human 2.0, in the demented, depraved, deranged minds of these people is the next step up in the evolution of human beings. And I'm saying that if you allow that to happen to yourself, you're no longer made in the image of God. You're

made in the image of Bill Gates and Klaus Schwab."

A Ploy to Tag Us for the NWO's Slave System

So, in summary, Zelenko believes that everything we've experienced so far – the aggressive marketing of the shots, the coercion and threats made to get as many injected as possible – has all been a ploy to "tag" as many people as possible in preparation for the New World Order's cryptocurrency system, which will be managed by a small select group, and used to enslave all of humanity.

As noted by Zelenko, the World Economic Forum has publicly announced that by 2030, the U.S. will no longer be a superpower, and a few countries will be in charge of global governance. Now, how do you destabilize an economic engine like the U.S.?

"You create a pandemic," Zelenko says. "You lock down middle class businesses, small businesses ... But you leave Walmart and Home Depot open ... It's a wealth transfer from the middle class to the people in power. It's a robbery, basically.

This is one big attempt at enslaving humanity. It's a brilliant plan, by the way. It's evil, but it's brilliant because slavery has always been the most lucrative industry and asset throughout human history. Now is no different. And so, you have a few sociopaths who believe in their immortality and think that they'll transfer their consciousness to some cyborg, enjoying the whole world as their playground."

Zelenko goes on to discuss the statements inscribed on the Georgia Guidestones, a huge granite monument erected anonymously in a small town in Georgia, which lays out 10 commandments. The first one is that the world population should be reduced to and maintained at 500 million. If the COVID shots continue, it's not inconceivable that the human population might be reduced to that size.

The Why Behind the Genocide

A few months ago, Elon Musk debuted his humanoid robots, saying that since these robots will eliminate 90% of the workforce, we therefore need universal basic income. This too is part of The Great Reset plan, which embraces both technocracy and transhumanism.

“Keep in mind that in the minds of these people, we're not made in the divine [image]. We're cockroaches. And they're not going to throw endless universal income resources at cockroaches for too long. They'll do it initially to identify the useless eaters, and then they will be liquidated. This has happened before.

Just 80 years ago you had the Nazi ideology based on eugenics, which created three classes of people. You have the ubermensch, what Nietzsche would call Superman. Then the mensch, which is the human, and then the untermensch, which is the subhuman. In the [Nazi] model, the [Nazis were] Supermen, descendants of Aryan gods. That gave them the power to enslave others.

So, for example, the Anglo-Saxons, basically Europeans, were meant to be slaves to the Aryans. And the subhumans, which I belong to – Jews, gypsies, Slavs, handicapped, political prisoners – we were meant to be vaporized, become dust.

That ideology did not go away. It resurfaced with the nuance that is not antisemitic right now. In a kind of an abstract way, we're all Jews this time, because the hierarchy here is not based on religion or identity, but rather on the deranged belief that they've evolved, the Superman of this generation, into a higher level of consciousness.

They're woke and they understand and are enlightened about the nature of the human condition. They're custodians of the planet, and therefore it's their

responsibility to make sure the planet has solvency, that it continues to exist. And therefore, we have to reduce the world population."

Cause for Optimism

While humanity is in a most precarious situation, Zelenko is optimistic about the future.

"I'll tell you what I really think is going on," he says. "There's what we see, and then there's the, let's call it spiritual physics, at play. Karl Jung, the famous psychoanalyst, wrote, 'The moral degradation of society begins with the degradation of the individual.' From that, we can actually learn that moral improvement of society begins with improvement of the individual.

We, as a society, over the last 50, 60 years, have made some very bad choices. For example, we've desanctified or defiled gender roles ... Marriage has lost its sanctity. The unborn are being massacred. In the Bible, there are two cities that were destroyed, Sodom and Gomorrah, and there's an analysis why that happened. It wasn't because of the immorality, because the whole world was immoral.

It was because they codified immorality into the law of the land. That's exactly what has happened in [the U.S.] We've devolved ... We worship the God of science, the god of technology, the god of money, god of power. Anything but [the true] God. And we are clearly practicing child sacrifice.

Dr. Michael Yeadon, former VP of Pfizer, told me personally, and then he actually publicized it, that for every one child that dies of COVID, 100 die from the vaccine. The [COVID shot] is 100 times more lethal to children than COVID. What do you call that? That's child sacrifice.

So, I feel that, by way of analogy, we're in the generation of flood. The house is going to get cleaned, and each individual is given a choice to get on the ark

or not.

Or, to make it simpler, who do you bow down to? Do you bow down to your creator, who makes you in every instant of time? Do you ask [God] for fortitude, endurance, strength, resolve, the ability to deal with the unknown and fear? Or are you going to give in to the fear and bow down to corrupt sociopaths, oligarchs, corrupt governments, and the false promise of the golden calf of these vaccines?

Because at this point, in this country at least, no one's holding you down and putting a needle into your arm. The majority of people, they want to travel by plane. They don't want to lose their job. They want to go to school. It's all these kinds of quality of life decisions. In other words, in a normal society, the parents sacrifice for the well-being of the children. In pagan societies, we sacrifice the children for the purpose of the adults."

Peaceful Civil Disobedience Is the Answer

So, what's the answer? Can we stop this transhumanist trajectory that threatens the very core of what makes us human? Can we prevent this plan for our enslavement from coming to fruition? Zelenko believes there is a way, as do I.

"The answer is we need organized civil disobedience. Do not comply. They can't imprison everyone. They can't fire everyone. They can't expel everyone. They can't lock down everyone. There's many more of us than them. And actually, let me speak to the military leaders, to the police, to people that are charged to protect society.

You also have children. You also have parents. And we are relying on you to do what's best for the citizens of this country, to protect us from all enemies, foreign and domestic. All we need to do is to coalesce with like-minded people. Take your kids out of school. Homeschool them. You can teach them

morality.

The World Health Organization came out with an edict that if your kids go to school, that's implied consent for the vaccine because you could have not sent them. And since you sent them to school, that's implying that you're consenting for them to be vaccinated, even without your knowledge.

Basically, we have to make small pockets, like cities of refuge, in a sense, of like-minded people; create an alternate society; do commerce with ourselves. I know there are forces really working hard to create an alternate cryptocurrency or blockchain system that is decentralized and would allow for people who don't want to be tagged with a digital identifier to transact with each other."

As noted by Zelenko, it's becoming more and more obvious that the pandemic measures were never about protecting us from COVID. It was always about creating a new world order. It was about setting the stage for a Great Reset to "Build Back Better."

But better for whom? The Build Back Better plan is about building "a society run by a few sociopaths and the rest of us enslaved," Zelenko says. The good news is that more and more people are now starting to see this plan, and "once that realization reaches a certain threshold of people, countries are going to change and fall like dominoes," he says.

As for when we might get our freedom back, that depends on us. As noted by Zelenko, "freedom isn't free." We were free (at least up until 2020) because our forefathers had the courage to confront tyranny. If we want our children to be free, we now have to display that same courage.

"Whether or not our children will be free depends on whether or not we are ready to sacrifice," Zelenko says. "Are we ready, in this generation, to pay the price to ensure that our children thrive in freedom and have the ability to

maintain God consciousness?

It's going to happen. The unknown variable is to body count. I would hope that this interview reaches the consciousness of every single human being. People must choose to say no from this point on."
